ILLINOIS INSTITUTE OF TECHNOLOGY – VENDOR APPLICATION FORM

The addition of a new vendor to the IIT Vendor Database is a controlled process that starts with a vendor approaching IIT directly (self nomination) or an IIT employee nominating a vendor of a desired good or service. While IIT encourages the identification of new vendors that may offer a competitive advantage for its buying needs, we also strive to limit the number of vendors. **Completion of this form does not mean you will be added to IIT's Vendor Database, only considered for addition.**

Vendors are added to the IIT Vendor Database when awarded their first purchase contract. Applications from vendors not added to the IIT Vendor Database will be discarded after one year from date of submission.

To be considered for nomination, a vendor must:

- Complete this new vendor application answering all questions
- Agree to the University's [Terms](#) and [Conditions](#) as posted at the [IIT Purchasing](#) website
- If chosen to work on IIT owned property, meet [IIT Insurance](#) requirements.
- Submit the properly executed application and any additional documents that may be required, directly to [IIT Purchasing](#).

IIT Purchasing will not unreasonably decline a request to add a vendor, however, it reserves the right to do so if:

- The good or service is already available from a vendor with a current IIT preferred contract
- Adding the vendor is not in IIT's best interest
- The vendor is excluded from conduction business with the U.S. Government.

Applications must comply with IIT Policy [AP 108 Required IRS Forms for Vendor Payments](#)
